

OneShield Enterprise Solutions: Line of Business Content

Ease implementation timelines leveraging, configurable pre-built content across all lines of business

Whether you are embarking on a core system replacement project or expanding your business product portfolio, OneShield Software gives your team the opportunity to leverage a detailed and rich library of pre-built Line of Business (LOB) content to give your implementation a head start. Use this proven LOB content to ramp-up a product or business, or quickly and easily tailor it with OneShield's built-in configuration toolset.

OneShield understands the critical role that content-related transactions play in growing your business. With pre-configured content, features and functions from over 46 lines of business, our extensive Line of Business library content is configurable across all lines of personal, commercial, life and specialty insurance. Coupled with a proven implementation methodology, OneShield's Line of Business content also includes pre-built and configurable rules and workflows with fully automated processes.

Any company-specific changes needed can be done easily with OneShield Designer, our intuitive, wizard-driven configuration tool, that allows business and technical users to quickly configure the user interface, workflows, rates, rules, forms and transaction processing methods to match your operations.

At OneShield Software, we're technology experts with deep roots in the insurance industry. Our comprehensive portfolio of business applications is tailored for insurance industry leaders looking to reduce expenses, improve efficiencies and optimize service delivery every step of the way. OneShield can help enhance and improve your operational and process efficiencies, agent and member service levels, and time-to-market for new products and changes.

OneShield provides everything you need for fast, proven insurance transactions and content generation, streamlining even the most complex systems and freeing up time for the things that are really important – like growing your business.

Key Personal, Commercial, Life and Specialty Line of Business Content Features

OneShield Software can help enhance and improve your operational and process efficiencies, agent and member service levels, and time-to-market for new products and changes.

OneShield supports all Lines of Business across personal, commercial, life and specialty markets. We also provide regional content for the United States, Canada and Australia.

- Non-Medical Professional
- Professional Liability

Life Lines:

- Variable Universal Life (PPVUL)
- Deferred Variable Annuities (PPVA)

OneShield Software: Powerful Technology, Workflows and Tools

Configure Your Own Workflows to Create Efficiencies

- Configurable processes framework by which discrete insurance actions can be customized into workflows for specific business requirements and end-user needs.
- Fully automate underwriting, whether it is STP (straight-through-processing) or intelligent referrals with decision support and traceability.

- Set customizable rules in over 200 diverse contexts, configurable via a powerful toolset.
- Support every line of Personal, Commercial, Life and Specialty Markets, including professional liability or industry-specific specialty lines, with a responsive, configurable engine and open architecture that improves service and lowers costs.

Powerful Design Tool and Version Management

OneShield Designer - a metadata-driven solution powered by tools and a pre-populated insurance-centric data model, configures virtually every aspect of the software application — including workflow, product definition, object model, as well as interfaces to legacy and third-party systems.

Functionality and capabilities include:

Version Management - tracks all design sessions and allows release engineers to identify, track, group, deploy or roll-back changes from development to quality assurance (QA), QA to staging, and staging to production. Version management is a metadata equivalent of a source-code versioning system.

Data Transformer - facilitates data exchange across environments and seamlessly integrates data exchange within the workflow.

Proven Technology Architecture

- Scalable and data-centric**, OneShield Software uses stateless **Java EE** enterprise-class architecture for fast and simple changes to product definitions, workflows, rating and the object-model.
- Built-in tools let you configure, test, version, release, transform data** for integration and more without writing code. The system easily **exchanges data** with dozens of applications using a variety of transport mechanisms and protocols.

- Our proven implementation model** includes full training and support, plus a unique mentoring approach for ongoing assistance.

Lower your Total Cost of Ownership with OneShield Line of Business Content

Leverage Extensive Pre-Built Insurance Content

- OneShield includes a comprehensive pre-built library of insurance-specific content.
- With our pre-defined and configurable data models, workflows, rules, rates and product definitions, you can eliminate the time-consuming and costly "ground-up" requirements-gathering process and leap straight into doing a gap analysis of our extensive content, and comparing it to your existing products to determine requirements quickly.
- OneShield's LOB content is so complete that some start-up companies have taken a large percentage of the content "as-is" and started writing business within weeks of purchase.

Seize Market Opportunities and Launch New Products Rapidly

- Changes in the industry come fast and you need to capitalize on market opportunities as quickly as possible.
- With our pre-built content and the built-in powerful configuration tool, OneShield Designer, you can rapidly roll out new products, modify existing products or refresh your existing products to help maintain your leadership position in existing markets and penetrate new markets.

Realize Advantages of Self-Sufficiency

- Performing ongoing maintenance and changes to your products to meet business and market drivers no longer requires outside consultants or specialized vendors.
- The intuitive nature of our design application, OneShield Designer, empowers your business and technical users to work collaboratively to achieve 100% self-sufficiency in modifying functions.
- You can significantly improve business agility, enabling you to market from inception to product launch within six weeks - all while lowering management and maintenance costs.

Ready to Simplify Your Business? It Starts with a Conversation.

OneShield Software delivers core business software solutions to the global insurance and broader financial services industry, deployed in the cloud or on premise. Our portfolio of standalone, subscription, and cloud-based software products includes enterprise class policy management, billing, claims, rating, product configuration, business intelligence, and analytics solutions that leverage a tool-based open architecture and single data model platform to streamline your business. OneShield Software automates and simplifies the complexities of core systems with targeted solutions, seamless upgrades, collaborative implementations, and lower total cost of ownership.

With corporate headquarters in Marlborough, MA and offices in India, Canada, and Australia, OneShield, Inc. has a total of 46 products in production across the P&C and Life insurance markets.
