

Loss Prevention

OneShield Market Solutions: Loss Prevention

Embrace innovation, lower costs and reduce IT complexity

OneShield Software Loss Prevention solution is designed to work the way you do, identifying exposures and hazardous conditions to prevent losses, save time and money and improve customer service.

At OneShield Software, we're technology experts with deep roots in the insurance industry. Our comprehensive portfolio of highly configurable, cloud-hosted business applications are tailored for insurance industry leaders looking to reduce expenses, improve efficiencies, and optimize service delivery every step of the way.

OneShield's As-A-Service software solutions are designed to automate business workflows and process highly customized policy and claims systems. Most importantly, our tools are compatible with existing legacy systems and custom-built to meet the specific needs of insurers.

Adaptable, integrated and secure, OneShield's Loss Prevention solution puts an end to rising IT costs and anxiety and leaves you with more time to focus on business priorities like customer service, growth and innovation.

"As-A-Service" (AAS)?

Looking to add organizational agility, operational efficiencies, unlimited scalability, collaborative access, and flexibility to your business?

Consider cloud-based "As-A-Service" technology: out-of-the-box integration frameworks and functionality, unlimited scalability, workflow automation, disaster recovery and failover protection, 24/7 technical support, and data security.

Working in the cloud with OneShield Software allows your business to be nimble, efficient and cost-effective — eliminating manual-based operations, enhancing speed-to-market, enriching analytics, and improving your bottom line.

AAS is why 95% of IT spending is expected to shift from in-house to the cloud by 2025, why 4 out of 5 carriers want to digitize core insurance operations, and why 66% of insurers are moving to the cloud to reduce overall cost of process delivery[†].

Key Core System Features

OneShield's Loss Prevention module is designed to streamline risk management activities by tracking events, surveys and training related to insureds, prospective clients and third-party customers. The module is used by both underwriting and claims departments for data collection and analysis to identify, manage and lower your exposure to risk.

Component Highlights

- Accurately identifies insureds who are worthy of attention based on exposures, on-site conditions, loss ratios and claims activities.
- Optional configuration for processing site surveys and data collection through tablet or hand-held device while untethered from the web.
- Integration with Geo-coding and Bing Maps for insured location tracking and management.

System Features

- User-defined scripts and forms for data collection
- On-site audit/survey documentation and diary follow-up
- Ability to upload photos and files
- Recommendation tracking
- Recording of training/certification sessions
- Time Tracking and Expense Billing

System Requirements

OneShield's cloud-based environment means technology requirements are simple. A secure URL and login algorithm gives users easy access, based on a security profile that defaults to their rights and privileges within the system.

OneShield's cloud platform is hosted in an SSAE-16 Type II certified data center, delivering 24/7/365 availability along with the peace of mind that your data is safe and secure. The hosted platform removes the expense of server hardware, supporting and maintaining networks, and database software.

Ready to Simplify Your Business? It Starts with a Conversation.

OneShield Software delivers core business software solutions to the global insurance and broader financial services industry, deployed in the cloud or on premise. Our portfolio of standalone, subscription, and cloud-based software products includes enterprise class policy management, billing, claims, rating, product configuration, business intelligence, and analytics solutions that leverage a tool-based open architecture and single data model platform to streamline your business. OneShield Software automates and simplifies the complexities of core systems with targeted solutions, seamless upgrades, collaborative implementations, and lower total cost of ownership.

With corporate headquarters in Marlborough, MA and offices in India, Canada, and Australia, OneShield, Inc. has a total of 46 products in production across the P&C and Life insurance markets.
