## FOR IMMEDIATE RELEASE

### **OneShield to Acquire Strategic Assets of Clear Data Strategies, LLC**

*Acquisition will open up new niche markets in the insurance sector for OneShield and extend OneShield's product offerings beyond enterprise-level solutions.*

**Marlborough, MA — May 20, 2014:** [OneShield, Inc.](#), a leading core systems software provider for the global insurance industry, announced today at its 2014 Client Conference that it has reached an agreement to acquire specific strategic and intellectual property assets of Danbury, CT-based **Clear Data Strategies, LLC** (CDS).

CDS provides both subscription cloud-based and site-installed software solutions for claims processing and policy administration for the property and casualty (P&C) insurance market. Customers of its Instream™ and Pyramid solutions include mid-sized and niche P&C carriers, self-insured organizations, specialty workers compensation insurance providers requiring full NCCI compliance, and TPAs and MGAs.

OneShield will absorb the CDS product line, and continue to support its growing and unique base of niche customers. OneShield will also leverage CDS' 25 years of expertise in claims processing, and use it to further enhance the capabilities and functionality of its own claims administration product offering currently in development.

"We are excited to be adding the CDS family of solutions to our suite of enterprise products," says Glenn Anschutz, OneShield's President and Chief Executive Officer. "This acquisition will expand our opportunities into lower-tier carriers, as well as specialty niche markets, where hosted and cloud-based solutions are increasingly popular."

"From an intellectual property standpoint, this also significantly augments our existing expertise in the area of claims processing," he adds. "The CDS team brings an aggregate of 60-plus years of experience in building rich and robust functionality into claims administration solutions."

Among key executives joining OneShield will be Chief Executive Officer Bill Kuebler, who has over two decades of experience running insurance technology companies.

"We are looking forward to being part of the OneShield team and strongly believe we will expand our own market penetration with the CDS set of cloud-based products by leveraging the strong OneShield brand," says Kuebler. "OneShield's expansive growth and strong reputation for focusing on products and customers, along with the continued market shift to cloud-based solutions, make for a perfect combined team."
