Reinsurance

Solution Overview

Cloud-based

Reinsurers play an important role in the underwriting process and the success of your business.

With OneShield's Reinsurance Cession Management functionality, you will have the business intelligence data and administrative tools needed to work more closely with reinsurers to expedite and facilitate the policy lifecycle.

OneShield
Enterprise

Providing you with the ability to look beyond policies and account for the influence of important market partners, such as reinsurers, OneShield includes vital reinsurance handling capabilities that streamline the administration and management of reinsurance agreements.

Using one centralized management registry, set up your reinsurers, register agreements, and track cessions to the treaty and facultative risks. Deployed through our full-service SaaS delivery model, OneShield Reinsurance Cession Management provides the flexibility and capability to register and manage reinsurers and concentrations.

Users can grant treaty or facultative authority to Reinsurer Partners, register agreements, proportional and non-proportional treaties, and facultative agreements, and track cessions by agreement or by the reinsurer.

At OneShield, our strengths lie in our people, deep-rooted insurance knowledge, and our thoughtful technical architecture.

Reinsurance Administration:

Gain a competitive edge in the marketplace.

Enhance your reinsurer relationships with a relationship management tool that allows you to track performance and open up new business opportunities.

Additional features include:

- Facilitates quota share, Surplus, and excess of loss treaties, with Risk level, Occurrence level, and Catastrophe level aggregation.
- Produce facultative detail and treaty bordereaux for each reinsurance partner and create the accounts payable. Ability to report reinsurance data to regulatory agencies, taxation authorities, and data collection participants.
- Eliminate errors with the automatic association of risks to treaties.
- Improves efficiency by automating the calculation of ceded premium, commission, and ceded loss amount

Cloud-based

Tools to empower insurance professionals.

Combining speed, power, and flexibility, our intuitive design tool unlocks a world of endless possibilities needed to succeed in a digital insurance marketplace. Enabling self-sufficiency and speed-to-market, OneShield Designer empowers your business and technical users to work collaboratively to create and modify discrete insurance actions. OneShield Designer allows the configuration of virtually every aspect of the system, including workflow, product definition, object model, and web services.

Enabling expanding ecosystems and third-party relationships, ORM provides tools to automate and control how you interact with third-party partners empowering them to manage staff, write new business, process address/contact change information, access billing statements, and process monthly reconciliation.

Actioning near real-time data and reports for informed and timely decisions OneShield Reporting uses dashboards, pre-defined cubes, standardized reports, and ad-hoc reporting to provide access to client information, system transactions, financial, operational, statistical, and marketing information for running your business operations.

OneShield's web portals are at the forefront of the digital-first landscape, offering a transformative self-service experience for both internal and external users. Through responsive and dynamic UX/UI design, our portals ensure a user-centric approach that adapts effortlessly to varying needs and devices. Moreover, we prioritize flexibility by allowing you to define user roles and permissions at multiple levels, while configuring rules and workflows to align with your specific distribution channels.

Technology that scales as your insurance business evolves.

Proven technology architecture:

Design, configure, and deploy all from our scalable JavaEE process automation platform. A well-constructed and comprehensive metadata-driven engine powers insurance transaction processing while providing the ability to handle both market and technology change cost-effectively with speed and transparency.

Software from the cloud:

Consider the power of cloud-based “As-A-Service” (AAS) technology; unlimited scalability, ease of upgrades, quicker deployments, disaster recovery and fail-over protection, 24/7 technical support, and data security. Working in the cloud with OneShield allows your business to be nimble, efficient, and cost-effective, eliminating manual-based operations, enhancing speed-to-market, enriching analytics, and improving your bottom line.

Cloud-based

OneShield
Enterprise

Lower your total cost of ownership with Reinsurance Cession Management.

Automate Processes:

Manage reinsurance premiums and commissions with automated payment and statement generation and direct integration with OneShield Billing. Automation improves reconciliation and auditability.

Leverage Extensive Pre-Built Insurance Content:

Our pre-built library of insurance-specific content for personal, commercial, and specialty lines eliminates time-consuming and costly “ground up” requirements gathering process with our comprehensive pre-defined and configurable data models, workflows, rules, use cases, reports, dashboards, and product definitions.

Realize the Advantages of Self-Sufficiency:

Closely monitor “approved” provider relationships with centralized management of “approved” partners for treaty and facultative reinsurance. Track reinsurance arrangements and usage with a single point of attachment for treaties and lower your risk for errors. Be proactive with automated warnings and tasks for treaty usage and breaches.

Enhance Agent & Customer Service:

Choose what aspects to share with providers through a secure web portal. Through the portal, reinsurers can examine their book of business in detail, thus reducing your reporting requirements and introducing partner transparency in favor of preferential pricing.
